SCHOOLS AROUND THE SITE

\$698m

ESTIMATED COST

WHAT DOES A FORENSIC BED MEAN?

It means secure detention and psychiatric treatment - not an ordinary hospital bed. Patients can include prisoners and people accused of, convicted of, or found to have committed serious offences - including homicide and child sexual offences.

OUR CONCERN IS THE LOCATION

We support modern forensic care and are not opposing the CLMI Act 2023. Our concern is whether its consequences were properly assessed before expanding this facility in a residential neighbourhood surrounded by four schools - where patients will transition into the community through supervised and unsupervised leave.

KEY QUESTIONS STILL UNANSWERED

- Infrastructure WA found the business case alone contained insufficient information for an investment decision. What further work was completed before approval?
- Infrastructure WA says 20 sites were assessed. Why was Graylands selected, and will the full comparison - including lower-density sites or locations closer to prisons - be released?
- Where is the location-specific risk assessment for community integration, including supervised and unsupervised leave near schools, streets and public spaces?
